EXPERIENCE

Morning Score, Copenhagen, Denmark

Senior Full Stack Developer

02/2023 - 05/2024

I played a pivotal role in managing Morning Score's SAAS Platform, a globally recognized SEO Tool. My efforts included enhancing the overall User Experience and User Interface through the implementation of React.js. Through strategic leadership, I steered our project to achieve competitive performance and capabilities, ensuring its success and prominence in the market.

- Improved overall UX/UI, utilizing **React.js** and **Material UI**
- Conducted data preprocessing using rich **Python** libraries including **pandas**, **Numpy**, **Matplotlib**, **scikit-learn**
- Communicated with app users to gather feedback and opinion to enhance performance and the way it will advance
- Integrated payment Gateways to provide Premium features
- Created numerous features among website analysis and ranking
- Troubleshooted issues within application and bugs in the code base, especially in backend **Django** project
- Wrote Unit Testing code, using Javascript test libraries like **Jest**
- Conducted code reviews and managed pull requests created by other team members
- Utilized **Google Analytics** to find performance obstacles and optimize
- Created CI/CD pipelines, following agile methodologies through the development with **Docker**
- Distributed documentation of Python-based frameworks including **Reflex**, via various communities and events
- Created reusable **React.js** components, researching recent front end components development trends
- Used **AWS EC2** to troubleshoot deployment issues while development process

Roweb, Arges, Romania

Senior Full Stack Developer

02/2022 - 01/2023

At Roweb, I developed and optimized web and mobile platforms using a diverse tech stack, implemented security enhancements, and integrated advanced tools to improve user experience and operational efficiency.

- Developed and maintained web components for [Homex](#) using **JavaScript**, **HTML/CSS**, **React.js**, and **Node.js**
- Redesigned and implemented the overall architecture of the **Homex** website interface for mobile platforms
- Leveraged Google Analytics to optimize SEO performance and address other performance issues for **Homex**
- Deployed production-ready solutions using **Docker**, **Kubernetes**, and cloud services such as AWS and GCPIntegrated complex tools and features within the [Smart Imobs](#) website using **Node.js** and **Bootstrap**
- Implemented social media integration, responsive design, and blog integration for Smart Imob
- Developed a custom multi-criteria search feature to help visitors find items easily

Orum, USA

Senior Full Stack Developer

03/2020 - 01/2022

I contributed to the development of an AI-based SAAS startup with keen insight into AI and web technologies, including Node, React, and Django.

- Created **React.js** components to display live conversation information between sales members
- Conducted streaming data analysis to reduce background noise
- Worked on several Microservices, improving performance like response speed, using **Node.js** and **Django**
- Integrated live payment options, helping salespeople and managers succeed within their process
- Created and Implemented various Dialing and Analysis Scenarios, collaborating with our Product manager
- Continuously developed and deployed Orum services, using Docker
- Communicated with customers to gather feedback

Advanced Web Ranking, Krakova, Romania

Full Stack Developer

04/2018 - 03/2020

My role involved reducing state management errors, launching secure backend services with Django and PostgreSQL, and migrating web applications from Vue.js to Angular. I also introduced MVP Node/Angular projects into production-ready solutions using Docker or Kubernetes.

- Migrated booking web applications from **Node.js** to **Spring Boot**
- Introduced several MVP **Node/Angular** projects into a production-ready solution using Docker or Kubernetes
- Implemented pixel-perfect user interfaces from Figma designs using **Next.js**, HTML, CSS, and JavaScript
- Worked on the full stack development of web products, using **React.js**, Next.js, **Node.js**, Java, Spring Boot
- Wrote pixel-perfect web pages, using PerfectpixelbyWellDoneCode extension with **React.js** and **Angular**

Kvalifik, Copenhagen, Denmark

Full Stack Developer

03/2016 - 03/2018

- Created and Developed several web applications with **React** and **Webflow**
- Designed, Developed and deployed a car selling website for [ev-remarketing](#), utilizing **Webflow** and **Docker**

Leapwork, Copenhagen, Denmark

Full Stack Developer

03/2015 - 02/2016

- Collaborated with cross-functional teams to define and implement cutting-edge user experiences in React
- Developed responsive web interfaces using **React**, **Redux Saga**, and SVG animations

Morningtrain, Odense C, Denmark

Back End Developer (Intern)

07/2014 - 02/2015

EDUCATION

Aalborg University, Copenhagen, Denmark

Bachelor's Degree in Computer Science

09/2011 - 06/2014
